Research Papers

An endonuclease activity of *Escherichia coli* that specifically removes 8-hydroxyguanine residues from DNA
M.H. Chung, H. Kasai, D.S. Jones, H. Inoue, H. Ishikawa, E. Ohtsuka and S. Nishimura (Japan) 1

Abnormal sister-chromatid exchange induction by 3-aminobenzamide in an SV40-transformed Indian muntjac cell line: Relationships with DNA maturation and DNA-strand breakage
B. Jha, S.D. Bouffler, C.S. Downes and R.T. Johnson (Great Britain) 13

Construction of *Escherichia coli* K12 *phr* deletion and insertion mutants by gene replacement
S. Akasaka and K. Yamamoto (Japan) 27

Roles of two types of O^6-methylguanine-DNA methyltransferases in DNA repair
K. Takano, T. Nakamura and M. Sekiguchi (Japan) 37

Inhibitory effect of cadmium and mercury ions on induction of the adaptive response in *Escherichia coli*
K. Takahashi, T. Imaeda and Y. Kawazoe (Japan) 45

The sensitivities of SV40-transformed human fibroblasts to monofunctional and DNA-crosslinking alkylating agents
J. Miyakoshi, D.A. Scudiero, J. Allalunis-Turner and R.S. Day III (Canada, U.S.A.) 55

Mutagenicity of Maillard reaction products from D-glucose–amino acid mixtures and possible roles of active oxygens in the mutagenicity
S.-B. Kim, I.-S. Kim, D.-M. Yeum and Y.-H. Park (South Korea) 65

'Rec-lac test' for detecting SOS-inducing activity of environmental genotoxic substances
T. Nunoshiba and H. Nishioka (Japan) 71

A mechanism for relief of replication blocks by activation of unused origins and age-dependent change in the caffeine susceptibility in xeroderma pigmentosum variant
Y. Fujiwara, M. Ichihashi, A. Matsumoto and H. Kataoka (Japan) 79

The role of DNA repair in resistance of L1210 cells to isomeric 1,2-diaminocyclohexaneplatinum complexes and ultraviolet irradiation
M.M. Jennerwein, A. Eastman and A.R. Khokhar (U.S.A.) 89

Ultraviolet mutational spectrum in a shuttle vector propagated in xeroderma pigmentosum lymphoblastoid cells and fibroblasts
S. Seetharam, K.H. Kraemer, H.L. Waters and M.M. Seidman (U.S.A.) 97

Introduction of a UV-damaged replicon into a recipient cell is not a sufficient condition to produce an SOS-inducing signal
S. Sommer, A. Leitaõ, A. Bernardi, A. Bailone and R. Devoret (France, Brasil) 107

UV mutation spectra in cell lines from patients with Cockayne's syndrome and ataxia telangiectasia, using the shuttle vector pZ189
W.J. Muriel, J.R. Lamb and A.R. Lehmann (Great Britain) 119

Genetic analysis of ionising radiation sensitive mutants of cultured mammalian cell lines
P.A. Jeggo, J. Tesmer and D.J. Chen (Great Britain, U.S.A.) 125

The genetic basis of resistance to ionising radiation damage in cultured mammalian cells
J. Thacker and R.E. Wilkinson (Great Britain) 135

Cytogenetic characterization of the ionizing radiation-sensitive Chinese hamster mutant *irs1*
J.D. Tucker, N.J. Jones, N.A. Allen, J.L. Minkler, L.H. Thompson and A.V. Carrano (U.S.A.) 143

Effect of passaging on Mer phenotype of human fetal cell cultures
R.S. Day III, L.H. Honore and K.D. Dobler (Canada) 153

Isolation and characterization of nitrogen mustard-sensitive mutants of Chinese hamster ovary cells
R.E. Meyn, D. Murray, S.C. VanAnkeren, G.S. Bernard, D.N. Mellard and M.L. Hobbs (U.S.A.) 161

Topoisomerase II activity in a DNA double-strand break repair deficient Chinese hamster ovary cell line
R.L. Warters, B.W. Lyons, T.M. Li and D.J. Chen (U.S.A.) 167

Establishment of a monoclonal antibody recognizing cyclobutane-type thymine dimers in DNA: a comparative study with 64M-1 antibody specific for (6-4)photoproducts
T. Mizuno, T. Matsunaga, M. Ihara and O. Nikaido (Japan) 175

Relationship of DNA strand breakage produced by bromodeoxyuridine to topoisomerase II activity in Bloom-syndrome fibroblasts
Y. Pommier, T.M. Rünger, D. Kerrigan and K.H. Kraemer (U.S.A.) 185

Preferential excision repair and non-preferential photoreactivation of pyrimidine dimers in the c-*ras* sequence of cultured goldfish cells
J.-i. Komura, H. Mitani, N. Nemoto, T. Ishikawa and A. Shima (Japan) 191

Specificity of mutational DNA sequence changes induced by X-rays in the cloned *Escherichia coli crp* gene
K. Takimoto, K. Uchino, K. Ishizaki and M. Ikenaga (Japan) 199

Partial complementation of the UV sensitivity of *Deinococcus radiodurans* excision repair mutants by the cloned *denV* gene of bacteriophage T4
P.D. Gutman, H. Yao and K.W. Minton (U.S.A.) 207

Effect of exogenous DNA fragments on human cell extract-mediated DNA repair synthesis
M. Biggerstaff, P. Robins, D. Coverley and R.D. Wood (Great Britain) 217

Characterization of O^6-methylguanine-DNA methyltransferase in transgenic mice introduced with the *E. coli ada* gene
Y. Nakatsuru, S. Matsukuma, M. Sekiguchi and T. Ishikawa (Japan) 225

The mode of action of 1-β-D-arabinofuranosylcytosine in inhibiting DNA repair; new evidence using a sensitive assay for repair DNA synthesis and ligation in permeable cells
C.M. Gedik and A.R. Collins (Great Britain) 231

Differences in accumulation of blunt- and cohesive-ended double-strand breaks generated by restriction endonucleases in electroporated CHO cells
N.D. Costa and P.E. Bryant (Great Britain) 239

A similar defect in UV-induced mutagenesis conferred by the *rad6* and *rad18* mutations of *Saccharomyces cerevisiae*
C. Cassier-Chauvat and F. Fabre (France) 247

Activation of RecA protein in recombination-deficient strains of *Escherichia coli* following DNA-damaging treatments
D. Simić, B. Vuković-Gačić, A. Ajanović and J. Knežević-Vukčević (Yugoslavia) 255

AP endonuclease and uracil DNA glycosylase activities in *Deinococcus radiodurans*
C.I. Masters, B.E.B. Moseley and K.W. Minton (U.S.A., Great Britain) 263

Purification of DNA fragments containing excision-repair patches from human cells using streptavidin–biotin
G.E. Larone and D.J. Hunting (Canada) 273

Site-specific mutagenesis using a gapped duplex vector: A study of translesion synthesis past 8-oxodeoxyguanosine in *E. coli*
M. Moriya, C. Ou, V. Bodepudi, F. Johnson, M. Takeshita and A.P. Grollman (U.S.A.) 281

DNA damage by 8-methoxypsoralen plus near ultraviolet light (PUVA) and its repair in *Escherichia coli*: Genetic analysis
J. Holland, I.B. Holland and S.I. Ahmad (Great Britain, France) 289

Erratum 299
